

Laser engraving machine

JCDQ 80W~150W

Applications

Our laser cutting machine JCDQ is specially designed for acrylic board, PVC board, electronic film, leather and plywood. The cutting surface is smooth and clear. Our machine can be used in handcrafted gift, packaging and printing, toy model, advertisement, electronic appliances and mobile communications.

Features And Functions

- ▶ The high-frequency enclosed CO2 laser tube developed by domestic top technology, which can uniformly emit light for 24 hours, and with anti-interference ability.
- ▶ The optical system uses total reflection and full transmittance silicon lens, the beam is fine and constant, the cutting depth is large, and the engraving precision is high.

Technical Parameters

Model	JCDQ0906	JCDQ1206	JCDQ1309	JCDQ1509
Cutting area	900*600mm	1200*600mm	1300*900mm	1500*900mm
Power	80-150w	80-150w	80-150w	80-150w
Machine size	2000*1100*1100	2000*1100*1100	2000*1400*1100	2000*1400*1100
Positioning accuracy	±0.01mm	±0.01mm	±0.01mm	±0.01mm
Memory capacity	32M	32M	32M	32M
Input voltage	220V±10%	220V±10%	220V±10%	220V±10%
Machine required space	Length: 2000mm Width: 1100mm/1400mm Height: 1100mm
